Content

Harvia is one of the leading companies operating in the sauna market globally, as measured by revenue. Harvia's brands and product portfolio are well known in the market, and the company's comprehensive product portfolio strives to meet the needs of the international sauna market of both private and professional customers.

SUSTAINABILITY

Sustainability has always been an important part of Harvia's business and the basis for the company's good financial performance. As the global sauna market leader, Harvia wants to lead the way in the industry for more sustainable sauna experiences that promote health and wellbeing. By healing with heat, the company contributes to a long and good life.

Preparing of the 2024 Sustainability Statement demonstrated that Harvia has been doing the right things when it comes to sustainability, which supports the company's ambition to drive the sustainability agenda of the whole industry. Sustainability is evident in the company's mission, vision and values and it is also an important differentiator, offering a competitive edge. Harvia designs and manufactures its products responsibly with respect for nature and people. Harvia has taken responsibility for its operations and products since 1950.

Harvia is committed to minimizing its ecological footprint and continuously developing the sustainability of sauna experiences with a safe and warm community of employees, customers and partners.

HEALING WITH HEAT

Sauna's heat is good for the heart

Taking 2–3 sauna baths per week is enough to lower the risk of cardiovascular disease by 20% compared to those sauna bathing only once a week. The risks may decrease by up to 65% the more one sauna bathes.

Laukkanen, Khan, Zaccardi & Laukkanen 2015

Sauna bathing improves sleep quality

A study investigating the connection between sauna bathing and sleep saw a 70% increase in deep sleep during the first two hours and 45% increase in six hours. There was a statistically significant decrease in the participants' staying-up time after sauna bathing.

Putkonen & Elomaa 1976

Sauna bathing is exercise

The heat of the sauna makes the heart pump blood faster, expanding the blood vessels and relieving the heart.

Brunt, Howard, Francisco, Ely, Minston 2016

Sauna bathing improves memory

Sauna bathing twice a week decreases the risk of dementia by one fifth compared to those sauna bathing only once a week. The risk is up to 60% less for people sauna bathing 4–7 times a week.

Laukkanen, Kunutsor, Kauhanen & Laukkanen 2016

Sauna bathing cherishes the skin

The heat of the sauna multiplies the amount of blood pumping through superficial veins, which boosts the skin's metabolism. The skin feels nourished, maintains moisture and stays soft and elastic.

Viinikka 2020

Sauna bathing treats muscles

Sauna is a great place for relaxing tense muscles. However, sauna bathing before exercise prevents muscle pains and increases muscle mobility afterwards.

Khamwong, Paungmali, Pirunsan & Joseph 2015

HEATERS

Be it an electric or a wood-burning heater, steamy or dry, one thing is for sure; it heals you. Harvia's heaters are your traditional source for modern well-being.

From the beginning, Harvia's heaters have been forged with quality as a priority. With over 75 years of craftsmanship, Harvia heaters are reliably built to last. Easy to use, practical, and safe – you are sure to find a fitting heater for your sauna.

How to control your electric heater

Easy:

Built-in controls

Fixed switches on the side of the heater (temperature + timer)

Pros: Easy, affordable, reliable

Cons: No remote use, limited functions

Ideal for: Basic users, small saunas

Heaters with manual control can be recognized by this icon

BUILT-IN controls
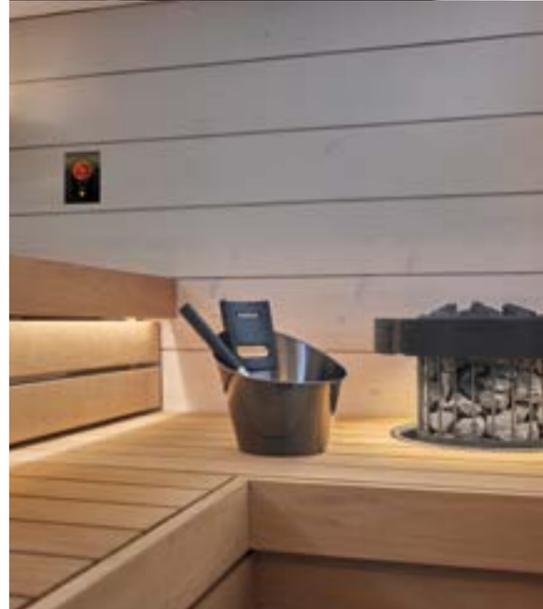

Practical:

Control panel included
(FC, XW and XE models)

The control panel comes with the heater and can be installed either inside or outside the sauna.

Pros: Easy to use, modern, better control than manual operation

Cons: Features vary depending on the model

Ideal for: Users who want a hassle-free, straightforward solution without additional accessories

Heaters equipped with control panel can be can be recognized by these icons

INCLUDED WiFi control panel

INCLUDED control panel

Flexible:

Separate control unit
(E models)

In addition to the heater, a separate control unit must be purchased, offering the widest range of features.

Pros: Full control and flexibility when choosing or replacing the heater. Easy to connect to WiFi, cloud services, and accessories (lighting, steamer, audio, etc.).

Cons: Requires a compatible separate control unit and installation space

Ideal for: Demanding users, families, and large saunas

Heaters that require a separate control unit can be identified by this icon

SEPARATE control unit

8 9

*Löyly [ˈløy̯ly] is a Finnish word that describes the evaporating hot and healing steam that comes from the sauna heater once water has been poured on top of it. Löyly creates the authentic sauna experience and brings the healing heat of the sauna to your skin and soul.

Electric heaters

Spirit

Harvia Spirit design heater is a high-quality electric heater that is designed and manufactured in Finland. The Spirit emphasizes safety and energy efficiency in addition to an excellent sauna experience. As its name suggests, Harvia Spirit is the spirit of löyly which guarantees soft and enjoyable steam. The Spirit supports WiFi control so you can conveniently control the heater with the MyHarvia mobile application.

Legend

Harvia Legend blends timeless design, where rustic elegance meets modern performance. The Legend celebrates Finnish sauna heritage reimagined for the modern world. Harvia Legend heaters, with their black steel frames and fine details, are built to last and filled with a generous stone mass – optimized to suit every sauna bather. They deliver intense steam when water is poured directly on top of the heater, and gentle, soft steam when poured along the sides.

Legend Pro

The Harvia Legend Pro provides you with the ultimate sauna experience. This large heater takes you back to the origins of heaters – it is a heater in its purest form. The patinated steel frame of the Harvia Legend contains a large amount of stones that gives off great steam even in large saunas as it heats up. Due to the open structure of the stone compartment, you can throw water on the entire outer surface of the heater. The heat charged in the large number of stones allows you to throw more water even at a lower tempera-ture – you can enjoy delightfully humid steam in your sauna.

Due to its circular shape, the Harvia Legend heater can be installed in the middle of the sauna or embedded into the bench. The heater is controlled by a separate control unit.

Concept R

The Harvia Concept R is a premium sauna heater designed for modern, private saunas. It's sleek, black colored design blends seamlessly into any contemporary sauna. The multi-layer construction keeps the outer shell of the heater cool to touch, ensuring safety and comfort. The Concept R uses high-quality sauna technology and warms up fast while maintaining a long lifespan. For added safety the heater features an optional safety switch for remote control operation.

Qube

Harvia Qube premium sauna heaters are designed to elevate every sauna experience – whether at home, in hotels, or in commercial spas. Built with Harvia's hallmark innovation and over 75 years of sauna expertise, the Qube product family combines advanced technology, robust durability, and effortless maintenance.

At the heart of every Qube heater is a smart, professional-grade design: the heating elements are housed in a separate chamber from the stones, which significantly prolongs the lifetime of the elements and ensures easy maintenance. The maintenance hatch allows for quick replacement of heating elements without moving the stones. Large stone compartments deliver soft, rich steam, or "löyly" as we call it in Finland, while multi-layer construction keeps outer surfaces cool and safe to touch. Enhanced air circulation ensures fast and even heating for an inviting sauna environment time after time.

Every Qube heater features a full stainless-steel body, crafted from high-grade materials to ensure exceptional longevity, corrosion resistance, and reliable performance even in the most demanding spa and commercial settings. The multi-layer construction not only reinforces the heater's structure, but also keeps the exterior cool to the touch, even during extended use, improving safety for sauna bathers and staff.

Cilindro

Harvia Cilindro pillar heaters are stylish electric heaters ideal for many needs. The size and massive stone quantity of the heater is optimised to provide a smooth, yet powerful sauna bath in saunas of all sizes – from small family saunas to large public ones.
The pillar form factor offers freedom for sauna design, making the heater easy to embed into the bench or place in front of a glass wall for an eye-catching display. The Cilindro heaters combine high quality with an impressive appearance. The glossy stainless-steel exterior is a great addition to any sauna.

Cilindro Pro

The Cilindro Pro electric heater gives off hearty steam in a family sauna, but the superior features of the heater are especially beneficial to public saunas, hotels and housing companies, for example. The impressive pillar heater contains a massive amount of stones, and the robust heating elements are designed to withstand long operating times. This guarantees plenty of hearty steam for large groups of users.

Virta

Harvia Virta is a strong, practical and simplistically stylish electric heater for those who want a traditional sauna experience. Virta is a perfect choice for medium to large saunas and excellently suited for those who enjoy frequent and long sauna baths. Familiarise yourself with the three powerhouse heaters of the Harvia Virta family, as well as their Combi variations with a steamer, and find the one that suits your needs.
After that, you can let the gentle steam and the feeling of relaxation take over both your body and your mind.

Virta Pro

The Harvia Virta is the perfect choice for a medium-sized or large sauna when you want a sturdy structure, reliability and a sleek and modern design.

Their strong structure and exceptional ease of maintenance make Virta heaters excellently suitable for those who use the sauna often and like to enjoy the steam for long periods of time.

All connections to the Virta heater are made through the maintenance hatch on the front. There is plenty of room around the connections. The heating elements are separated from the stones, which results in a long heating element life span. If you need to replace a heating element, it is a quick and easy task, as you can just pull out the entire heating element module. Other maintenance measures were also taken into account in the heaters' design from the very start.

Forte

Harvia's always-ready Forte electric sauna heater is a perfect choice for those who use the sauna fre-quently and want to enjoy the heat immediately. Forget the hustle and bustle of everyday life and enjoy the health benefits of going to sauna anytime you want. All you need to do is lift the cover, throw water on the hot stones and enjoy the pleasant sauna experience offered by the Forte heater. With the Forte heater, you can enjoy an extremely humid steam bath or a hotter and drier sauna experience – what-ever you like.

The Wall

The Wall requires only a little space inside the sauna. This heater was created with a focus on functionali-ty. Illumi-nated switches, durable construction, and ease of installation make The Wall a great product. The total package is both compact and stylish. The unique Harvia mounting/wall rack included in the scope of delivery determines the minimum safety distance between the heater and the floor. Installation of the heater is quick and easy.

The model E and Combi heaters are controlled by a separate control unit. Thanks to the control unit, The Wall E can also be integrated into the bench, giving you more flexibility about the design of your sauna room. The integrated steamer of the Wall Combi heater generates and maintains steady humidity in the sauna – with precision down to the percentage. The steam makes the sauna heat more pleasant, provid-ing a soft and humid bathing experience. You can add fragrances to the stone cup of the sauna heater.

Wood-burning heaters

Legend

Harvia Legend blends timeless design, where rustic elegance meets modern performance. The Legend celebrates Finnish sauna heritage reimagined for the modern world. Harvia Legend heaters, with their black steel frames and fine details, are built to last and filled with a generous stone mass – optimized to suit every sauna bather. They deliver intense steam when water is poured directly on top of the heater, and gentle, soft steam when poured along the sides.

Cilindro

The Harvia Cilindro is a modern wood-burning pillar heater that is ideal for medium-sized saunas. Its generous stone capacity ensures excellent steam production, while the unique ventilation duct at the back allows fast heating time.

The durable stainless-steel exterior ensures quiet operation, and the glass door adds ambiance by cast-ing a warm glow inside the sauna. Replaceable air control plates in the firebox enhance the longevity of the heater.

The Harvia Cilindro is designed and crafted in Muurame, Finland.

Linear GreenFlame

Harvia Linear 22 GreenFlame® is a timeless and elegant black wood-burning heater with a large glass door that creates a wonderful atmosphere and highlights the fire beautifully. The heater is perfect for medium-sized saunas and boasts lower emission levels thanks to the Green-Flame® technology. GreenFlame® ensures a controlled burn, reliable operation and a long life for your heater. The stones of the Linear 22 GreenFlame® heater heat the entire sauna quickly, offering enough heat even for the most demanding sauna bathers. Linear GreenFlame® represents pioneering quality in sauna heater technology.

The heart of the heater is a fully updated GreenFlame® fire chamber, which has been designed with clean combustion in mind. The new fire chamber reduces the particulate emissions generated by wood com-bustion by 20% and carbon monoxide emissions by 70%. The updated GreenFlame® fire chamber is an element in Harvia's determined development efforts towards cleaner combustion and emission reduc-tions. As a long-term goal, Harvia has decided to cut the particulate emissions of wood-burning heaters by half.

The Linear GreenFlame® heaters can be used to heat up bathwater at the same time as the sauna with 20% lower emissions. You can select the model that suits you best based on the interior decoration of your sauna. The water tank is fixed either at the front (ES), right (RS) or left (LS). The water tap is conven-iently positioned towards the bottom of the heater so that hot water can be run into any container safely.

Linear 22 GreenFlame

Pro

The classic Harvia Pro product family includes wood–burning heaters that are suitable from medium–sized saunas to large saunas. The Pro range also includes heaters with integrated water tanks and DUO models that are installed through the wall. Harvia's Pro series wood–burning heaters are known for their quality and longevity. Harvia Pro wood–burning heaters heat up the sauna quickly and provide excellent sauna experience.

In the traditional models of Harvia Pro heaters, the front and top of the heater are made of stainless steel, which is easy to keep clean. The sides of the heater are painted black and the fire that roams behind the glass hatch illuminates and creates cozy atmosphere in the sauna. Changing the glass hatch handed-ness by your sauna increases comfort and safety in use. Harvia Pro heaters are easy to maintain and in-stall, and the adjustable legs allow you to adjust the heater to a stable and correct height for the chimney opening. Separate service hatches in the flue openings make maintenance easy and the large ash box of the heater is easy to empty.

Harvia 50

The Harvia 50 SL is the king of public saunas and designed for large groups. The huge amount of stones releases heat evenly into big spaces. This wood-burning heater offers bathing in the true spirit of traditional Finnish sauna.

Harvia 50 is designed for use in very large public saunas. The recommended size of the sauna room is 20–50 m3. The heater is painted in a stylish graphite black.

The SL models are designed for people who want to conveniently heat their sauna from another room or outside the building. The opening direction of the door can be changed, making these wood-burning heaters even easier to use.

Harvia Duo glass wall

The Harvia Duo glass wall is a brilliant innovation. Designed for use with Harvia Duo heaters, the glass wall is not only a decorative element, but a way to share light and heat between the sauna and the sitting room. The glass releases more heat to the sitting room than masonry walls, and does so much more quickly.

You can also install the heater and the glass wall so that the heater door opens to your patio and the glass wall allows natural light to illuminate the sauna. The light-coloured satin glass wall also makes it possible to bring large glass surfaces to outdoor saunas.

The Duo glass wall is compatible with all Harvia Duo heaters.

The Duo glass wall is an easy solution

- The Duo glass wall is an easy solution
- no masonry
- the delivery contains all the necessary parts, including plating for covering the fire chamber extension and a floor protector
- get the benefits of the Duo heater in the sauna room: the room stays tidy and you can place the benches as freely as in an electric sauna

Chimneys & pipes

Harvia steel chimneys

Made of stainless steel, Harvia steel chimneys are heat-insulated, withstand high temperatures, so ideal for detached sauna buildings. The modular chimneys are easy to install in a variety of saunas, such as detached sauna buildings and barrel saunas. With extensions, the pipes can be made up to five meters long. The extensions increase the length by either 50 cm or one meter at a time. The threads on the pipes make for very easy installation. The chimney damper module can be used to reduce heat loss in the sauna building after bathing. The installation is easy to complete with the appropriate package that contains everything you need, such as the rain collar, heat insulation and decorative shields for the lead-through. Harvia steel chimneys and their modules are CE-approved.

SAUNA CONTROLS

Imagine coming home to a sauna already warmed to your perfect temperature and softly lit, ready to envelop you in comfort. A Harvia sauna control makes this scenario a reality by turning your heater into a smart, responsive heart of the sauna. Whether you're stepping into a traditional family sauna or managing the experience from your phone, a sauna control brings precision, convenience and pure enjoyment to every session.

Harvia's range of sauna controls offers something for every sauna goer.

Control unit includes

- ⚏ Control panel
- ⚡ Power unit
- 🌡 Temperature sensor
- 💧 Humidity sensor (Combi versions)

Devices that can be connected to the control unit

- 🔥 Electric heater
- 🌀 Ventilation
- 💡 Lighting
- 🛡 Safety devices
- 📱 Door sensor

FE**N**IX

MyHarvia

What is a sauna control?

Essentially, a sauna control system is made up of three key parts: the control panel, the power unit, and the temperature sensor. The power unit is the engine – typically installed outside the sauna or built-in in the heater – that functions between your heater and the control panel. The control panel is the visible, intuitive interface where you adjust heat, set timers, control lighting and more. And the temperature sensor ensures your sauna's temperature stays at just the right level with no surprises.

Precision, comfort and peace of mind

All Harvia control units, from simple switches to sophisticated touchscreens and mobile apps, are built on decades of sauna expertise. They're easy to use, beautifully designed, and made to work seamlessly with your sauna heater. Set a timer for when you want the sauna to be ready, check the current temperature at a glance or fine-tune the atmosphere by controlling lights and fans, all with a single panel or tap of your phone.

And the benefits go beyond convenience. Sauna controllers offer peace of mind through built-in safety features and they give every sauna session a personalized feel. With select models offering WiFi-connectivity and mobile app integration, you can even manage your sauna remotely: warming it up before you arrive, receiving helpful notifications or monitoring usage over time.

Read more about sauna controls

Meet MyHarvia 2

Harvia's next-generation mobile app that puts complete sauna control in your pocket

MyHarvia 2 enhances the full Harvia sauna experience with an intuitive interface and user-friendly design. Connect the app with Harvia's latest WiFi-enabled heaters and control units and you'll be able to monitor and manage your sauna from anywhere. From the very start, MyHarvia 2 includes the Core tier (the free built-in feature set) on all new compatible products – plus a complimentary 3-month trial of the premium Control tier to let you unlock remote functionalities right away.

The same intuitive user experience from control panel to mobile

Using MyHarvia 2 is as simple as using the new Harvia Fenix control panel. The app's look and feel is the same as Harvia Fenix control panel, so you'll find the controls familiar and easy to navigate. This consistency means there's no learning curve – whether you're adjusting temperature on the wall-mounted Fenix display or on your phone, the experience is smooth, modern and enjoyable.

Installation is effortless as well: a guided setup wizard and QR code pairing connect the app to your control panel in minutes, so you can spend less time configuring and more time relaxing in the warmth.

Feel free to test out the app in a demo mode and see for yourself.

More than just turning the sauna on

MyHarvia 2 opens a world of smart features that enrich your sauna routine and give you deeper insight into your wellness. For example, you'll receive a notification when your sauna has reached the perfect temperature – so you know exactly when it's ready.

The app provides in-app guidance, real-time temperature data on how your sauna warms up over each session, turning data into knowledge you can use to tailor your experience. Over time, MyHarvia 2 keeps track of usage statistics like total heating hours and number of sessions, helping you appreciate your sauna habits and progress at a glance.

MyHarvia 2's smart technology doesn't stop at data; it also makes your life easier. The app includes three customizable presets for your sauna settings. Want a gentle morning sauna or an intense evening sauna? Save your favorite heat and duration settings as presets and start the ideal sauna with a single tap.

Always up to date

With MyHarvia 2, your sauna is always up-to-date and improving. Thanks to built-in WiFi connectivity, we can deliver new firmware and app features to your sauna control system automatically via over-the-air (OTA) updates. That means your system keeps getting better over time without you lifting a finger. We ensure you're always running the latest and greatest MyHarvia app, so you can enjoy long-term value from your sauna.

And we're just getting started – Harvia's digital ecosystem will continue to grow, bringing even more innovative updates to MyHarvia 2 in the future. Your sauna experience will only keep evolving.

Download from

Fenix

The Harvia Fenix product family brings smart, stylish, and effortless sauna control into your everyday life. Designed for both performance and ease of use, Fenix products elevate your sauna experience with intuitive features and seamless connectivity sprinkled with intelligent performance learning.

Built-in intelligence, tailored to you

With Harvia Fenix you can easily control your sauna's temperature and duration. The intelligent, AI-powered learning technology. of the Harvia Fenix informs you precisely when the sauna has reached your desired temperature. Fenix includes three heating presets – Mild, Cozy, and Hot – that you can customize or replace with your own. The system learns how your sauna heats up and adapts to deliver consistent performance.

Always WiFi-connected

Every Harvia Fenix control unit comes WiFi-enabled by default. No need for extra modules or add-ons. This built-in connectivity allows for remote functionality via the MyHarvia 2 app, and ensures your panel stays up to date automatically with over-the-air (OTA) updates.

Easy upgrade for Harvia Xenio users

The Harvia Fenix panel is a simple upgrade for existing Harvia Xenio control panel users. Both panels use the same data cable, so you can install the Fenix panel yourself without the need for an electrician.

Please note that the Fenix panel is slightly larger. If your Xenio panel is flush-mounted, the mounting hole will need to be made a little bigger. You can activate remote control through an in-app purchase in MyHarvia 2 app or by using a voucher code if your Fenix product doesn't already include a license. The remote control license is only included with the Fenix add-on kits (FX001W and FX002W).

PRO B and PRO C

Pro B2, Pro B3
For commercial sauna use and new sauna experiences

The PRO series by sentiotec has been developed to meet the high demands of commercial sauna environments, such as those in public baths and hotels. These versatile control units, including the PRO B and PRO C models, offer exceptional functionality and user-friendliness.

The PRO B2 and PRO B3 control units are designed primarily for controlling sauna cabins in commercial settings. These units ensure reliable operation using high-quality and durable materials. They feature a clear and intuitive selection menu, allowing for easy management of the sauna, including the lighting and ventilation systems. When connected to the Internet through the PRO Net control unit, the sauna can be conveniently operated remotely.

The PRO C2 and PRO C3 units introduce a new level of sauna experience by integrating both electric heaters and infrared radiators. With these control units, users can effortlessly manage both sauna heaters and infrared systems, creating a versatile and customizable sauna environment. Like the PRO B series, the PRO C units also control lighting and ventilation, with the added advantage of remote control via the PRO Net system. Designed for commercial use, these units handle high-output sauna heaters efficiently, providing a comprehensive solution for modern sauna experiences.

PRO D series

The PRO D family from sentiotec impresses with its modern and timeless design and can be installed either outside or inside the sauna. In other words, directly in the sauna, right next to you.

The PRO D2 allows you to easily and conveniently bring your sauna heater to the desired temperature. And if you would like it to be a few degrees warmer, you do not have to get up to make changes.

With the PRO D series, you can adjust all settings from the bench.

With the PRO D2i, you also have the option to place and operate an infrared radiator in your sauna. An additional operating unit can be placed right next to the radiator to control the intensity.

Xenio

Harvia Xenio is a control unit with a touch control panel. Xenio provides a modern and subtly stylish user inter–face for controlling the heart of the sauna, the heater. The stylishly small yet clear touch control panel is easy to install where you want it: in the sauna, the shower room, the dressing room, or even the living room. The control panel enables you to see with just one look when your sauna is at the right temperature for you.

C series

The control units of Harvia C series are manually used and reliable basic control units that allow you to easily control the temperature and the heater's on-time from 1 to 12 hours, depending on the needs of the sauna-goers. The control units can be used to control the heater of both family saunas and public saunas (2.3–17 kW). Reliable Harvia quality. The delivery includes a separate temperature sensor with a 4-metre cable.

C105VKK

C105VKK is a control unit with Bluetooth technology that enables the control of sauna functions with a mobile device. C105VKK controls all types of saunas: biosaunas, conventional saunas, infrared saunas or combinations of the two – hybrid saunas. You can also control the lighting and music playback in your sauna.

The functions can also be controlled using the stylish operating unit. The selection menu is clear and self-explanatory. C105VKK is the perfect solution for family and public saunas and can be secured with an access code.

C170VKK

The Harvia C170VKK control unit with a week timer makes using the heater and the entire sauna very convenient. The new model is easy to install when replacing the old C150VKK – you have the use of old familiar features and functional new features in one. Designed for communal saunas, such as saunas in housing companies, spas and swimming halls. The control unit contains versatile week timer control and remote start features. The easy-to-use touchscreen allows you to control all the necessary functions, such as the electric sauna heater, lighting, ventilation, electronic locks and the safety device connection.

C400VKK

Harvia C400VKK is an electric-sauna-heater control unit for professional use. With its week timer, remote starting, and a wide range of functions, it enables versatile use of the sauna premises. The unit is suitable for max. 40 kW heaters. Installation is easy. Harvia C400VKK is a redesigned version of the C260 control unit that is considered a classic among professionals. In addition to the electric heater, the control unit can be used to control lighting, electric locks, and ventilation.

Block

The Harvia Block sauna brings together comfort, efficiency, and modern design—backed by 75 years of sauna expertise and timeless Finnish craftsmanship.

Create your perfect atmosphere with the remote-controlled RGBW LED lighting, adding a touch of color and calm to every sauna session. The Block sauna heats up quickly and stays energy efficient. The glass elements are made from safety glass, and the robust bench structure is built to comfortably accommodate even larger group of people.

From unboxing to first steam, the Harvia Block sauna is designed for an ultra-fast and hassle-free assembly – bringing spa-level relaxation to your home in no time.

Fenix

The Harvia Fenix sauna is a beautiful tribute to ancient sauna traditions — an ode to the cultural roots of the Finnish smoke sauna. Its dark, black-treated spruce exterior evokes the rustic look of traditional smoke saunas, while the light aspen benches bring a clean, contemporary contrast that makes the design feel both classic and modern.

Harvia Fenix prefabricated saunas are equipped with a large, impressive glass wall. With the optional RGBW LED lights, you can easily create a different atmosphere in the sauna.

Fuji

Harvia Fuji takes inspiration from the iconic Mount Fuji, a revered symbol in Japanese culture. Reflecting the same sense of majesty, we designed a premium sauna cabin crafted to meet your specific wellness needs. With Harvia Fuji, you can choose from a carefully curated selection tailored just for you. Will you opt for the Finnish sauna experience or a humid combi sauna variant? Once you've decided, personalize further by selecting your preferred interior and exterior finishes — choose from oak or aspen to create the perfect atmosphere for your wellness sanctuary.

Lindea

The Harvia Lindea sauna cabin offers a refreshing sauna experience with an interior crafted entirely from light–col-ored linden wood, creating a bright and spacious ambiance to your sauna. A key design feature of the Harvia Lindea is its unique shadow gap detailing, which introduces soothing contrasts for a visually relaxing atmosphere. The décor elements are mounted on a black rear wall, making it easy to replace individual panels if they experience use from frequent infusions. This thoughtful design allows your sauna to maintain its elegance over time, with minimal maintenance.

Variant view

The Harvia Variant View sauna cabins are specially designed to help you relax, so kick back and enjoy the warmth of the sauna on the comfortable Variant View benches. Both exterior and interior walls and ceiling are made of natural spruce, and benches are made of light aspen.

Variant View is an easily installable standard sauna cabin, and you can install benches on either side of the sauna. High-quality large glass walls on the front, let in natural light and create an open and spacious feeling. A warm and inspiring ambiance can be instantly created with the optional DMX – controlled color lights.

Ventura

Harvia Ventura invites you to unwind in style, with its elegant, waterfall-inspired curved benches that bring a sense of natural flow to your sauna experience. Crafted from light-colored ash wood, chosen for its strength, durability, and the beauty of its natural grain, the Ventura sauna embodies timeless design and resilience. The interior is wrapped in ash veneer for a warm, inviting atmosphere, while the exterior features a striking combination of full front glass and black spruce side and back walls. Each sauna bench is made from durable ash veneer, perfectly complementing the natural elegance of space. Let the gentle heat of the Harvia Ventura sauna envelop you in pure relaxation, surrounded by beautiful, high-quality materials that elevate every moment.

Bathroom saunas

SmartFold

The Harvia SmartFold 2.0 sauna is a true space-saver. The sauna can be conveniently folded up when not in use, saving floor space compared to traditional saunas. The SmartFold 2.0 features a modern Harvia Delta heater, which also controls the sauna's lighting via its control panel. The lighting can be used even when the sauna is folded up, stylishly illuminating the entire bathroom. The dimensions of the SmartFold 2.0 when open are 120 x 120 cm, and when folded, 120 x 60 cm.

The Harvia Delta heater's 3.6 kW output, combined with the sauna's compact size and high-quality insulation, saves electricity compared to a traditional sauna. The sauna also heats up quickly, making it ready for use in no time.

Safety is emphasized in the design: the sauna can only be heated when it is opened ready for use. The sauna is also accessible for wheelchair users when the benches are left in the upper position.

The Harvia SmartFold 2.0 sauna is designed for easy installation, and the heater is connected with a plug to a grounded bathroom outlet—no electrician is required for installation.

INFRARED

Infrared radiation comes in three types: Near Infra-red, Mid Infrared, and Far Infrared. Full Spectrum infrared combines all three into one system.

In our product range, you can choose between high-quality Full Spectrum infrared radiators or Far Infrared (FIR / IR-C) panels, depending on what best suits your needs.

OUTDOOR PRODUCTS

If you are building your own backyard paradise, why not include a sauna there too? Our outdoor saunas are available in many different sizes and you can customize many of them to suit your own needs. Outdoor saunas can be installed in your home's backyard or at the lake of your cabin. You decide where your healing with heat experience is taking place.

Hot tubs & cold plunges
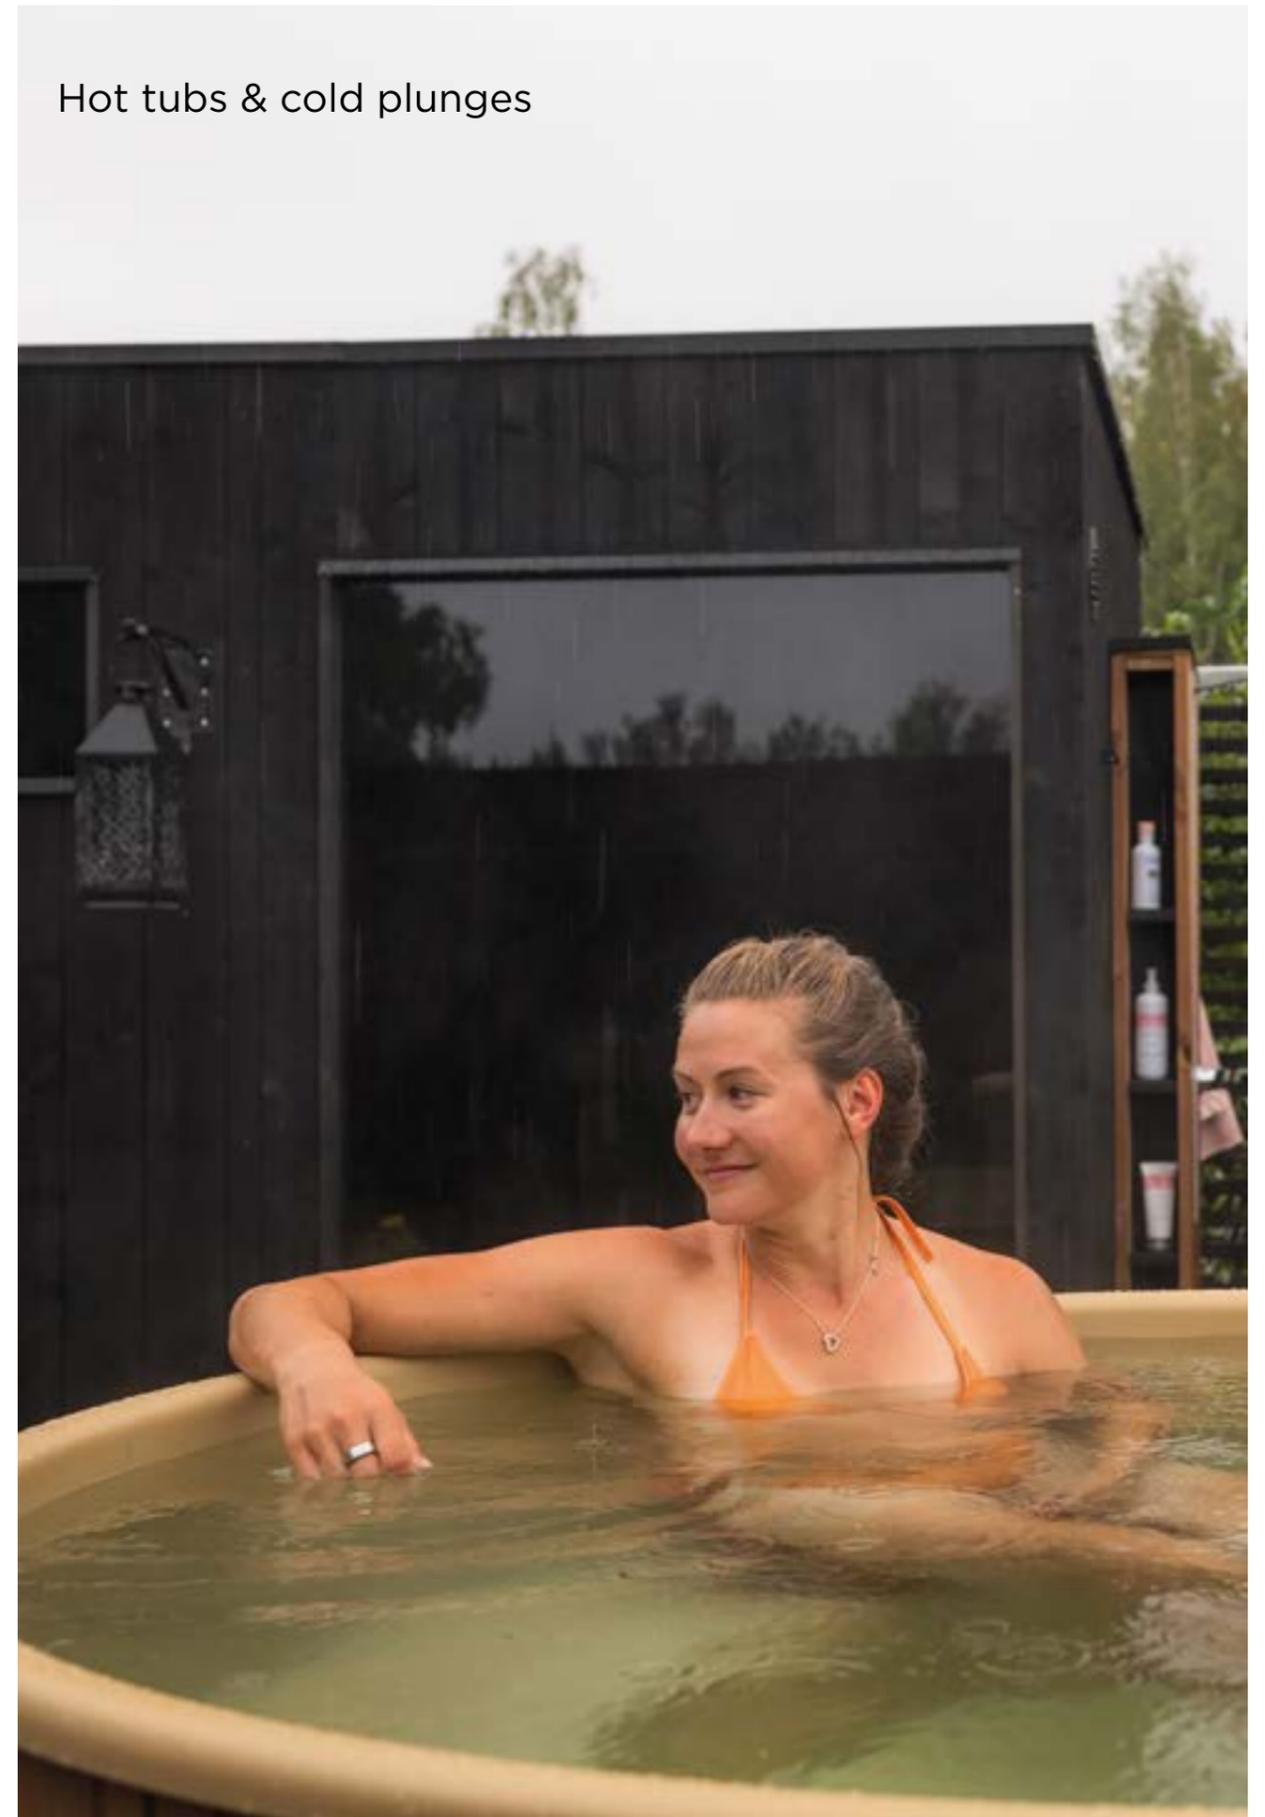

Tub colours & materials

The benefits of plastic tubs include great hygiene and flexibility. Dirt and impurities come off easily from the smooth inner surface, which does not peel even after years of use. The inner surface requires no maintenance, which means that the tub stays neat and clean year after year. Kirami's plastic tubs have been made out of either LDPE (low-density polyethylene) or HDPE (high-density polyethylene). LDPE and HDPE plastics are used in the food industry, and they are recyclable and UV protected. Both plastics come in several different colours. The inner surface of a tub made out of HDPE plastic is velvety smooth.

Casual Gray
Casual Gray — LED — Hazy

Light Gray

The slightly translucent, velvety smooth dotted light grey is both trendy and timeless. Suitable for all environments.

Casual Gray

The translucent grey is always stylish and aesthetic. Harmonious and suitable for many different kinds of environments.

Soft Beige

The translucent dotted beige is neutral, stylish and velvety smooth.

Caramel Beige

The caramel-toned beige is a warm, translucent colour that highlights the peace of nature.

Champagne

A clear, magnificently glossy champagne colour for elegant and memorable bathing experiences.

Outside colours and materials:

Thermowood (TW)
Thermowood — Breezy, Tiny, Woody Tiny, Tiny Dippy, Woody

EcoPlank (EP)

A durable panel made out of recycled plastic with a smooth surface that requires no maintenance.

EcoStripes (ES)

A durable panel made out of recycled plastic with a grooved surface that requires no maintenance.

Stained Spruce (ST)

Natural stained spruce panel. The beautiful brown tint will stay goodlooking for a long time. We recommend re-staining every couple of years.

Thermowood (TW)

Original and natural heat treated pine panels have a beautiful warm brown shade.

Red Cedar (RC)

Multi-hued, nearly branchless wood is very beautiful and becomes darker over time, into a more even grey hue. Top-quality rot resistance.

Tub heaters

All Kirami by Harvia hot tub heaters are made in high-class AlMg3 marine aluminium, which is an excellent heat conductor. Every heater is pressure-tested for leakages before it leaves our factory.

SOUND & LIGHT

Complete your sauna with the finishing touches that make all the difference. Premium sound systems, mood-enhancing lighting come together to deliver a truly immersive wellness experience.

Loudspeakers and exciter require a separate player with controllable audio output (e.g., PROD-BT) and permanent sauna installation.

Water-resistant sauna speakers are portable, rechargeable, and connect to mobile devices via Bluetooth.

ACCESSORIES

The right accessories make all the difference. Our sauna accessories are designed to improve comfort, usability, and the overall sauna experience.

Sauna heater stones

Olivine diabase

Durable in structure and high in specific gravity, olivine diabase retains and dissipates heat well, offering an excellent steam bath.

- AC3000, Ø 5–10 cm, 20 kg/box
- AC3020, Ø 10–15 cm, 20 kg/box

Elite Pro Heavy Duty

Elite Pro Heavy Duty sauna heater stones are made from the finest Finnish olivine diabase and heat-treated at approximately 1,000 °C, resulting in a long service life and making them an excellent choice for frequently heated public saunas.

- AC3050, Ø 5–10 cm, 20 kg/box
- AC3055, Ø 10–15 cm, 20 kg/box

Black vulcanite

These dark sauna heater stones are made of fine-grained, dark grey volcanic rock. When wet, they turn black, adding a unique touch to the look of the sauna.

- AC3040, Ø 5–10 cm, 20 kg/box
- AC3045, Ø 10–15 cm, 20 kg/box

Rounded sauna heater stones

The rounded olivine diabase sauna heater stones resemble round natural stones that can be found for example in larger rapids, adding an impressive finish to the surface layer of the sauna heater. If you have a heater with a small stone space, whether it is an electric heater or woodburning stove, we recommend round stones on top of split-face stones, as this increases the evaporation surface lower down in the stone space. This prevents the water from flowing directly past the stone space. This combination enables a pleasant steam and efficient heat generation.

- R-991, Ø 5–10 cm, 15 kg/box
- R-995, Ø 10–15 cm, 20 kg/box

Decorative stones

Red Granite decorative stone for atmosphere

Red granite is an impressive decorative stone that ensures a soft steam bath and a warm atmosphere in the sauna.

- AC5000, Ø 5–10 cm, 10 kg/box

White decorative stones to crown the sauna heater

White decorative stones ensure a soft steam bath and add a fresh and clean touch to the sauna.

- AC4000, Ø 5–10 cm, 10 kg/box

Annual change of sauna stones:

- extends the service life of the heater
- saves energy
- keeps the sauna clean
- guarantees the best sauna experience
