1950 - 2020

## Relaxing Moments & Natural wellbeing

*This year, Harvia will celebrate its 70th anniversary. Founded by Tapani Harvia in 1950, this sauna heater manufacturer has grown into an international sauna and spa company. We provide everything for your sauna.*

*In a Harvia sauna, the essential elements of nature – wood, stone and water – combine to create a relaxing oasis of well-being. The sauna is a comprehensive experience that lets you enjoy the natural well-being that stems from Finnish sauna traditions.*

*The soft heat of the sauna has a positive effect on your health. For example, it improves blood circulation, reduces the risk of heart disease, helps muscles recover, deepens sleep, reduces stress and relaxes both physically and mentally.*

*The soft and steady heat emitted by the heater is the heart of the perfect sauna experience. The heater is the heart of your sauna – the source of a relaxing sauna bath. Harvia's popular heaters have always been pioneers – elegant, durable and economical.*

*We value nature and its diversity. That is why we want to take care of its purity by developing products that are as environmentally friendly as possible. Harvia's versatile range of heaters makes it easy to choose a heater that suits your needs.*

## Harvia's Woodburning stoves

A wood-heated sauna offers the most authentic feel of Finnish sauna culture. The scent of birch logs, the ambient light cast by the glowing flames and the pleasant hum of the stove offer a moment of relaxation and time away from hectic everyday life. Harvia combines the pleasant heat of a woodburning stove with comprehensive and uncompromising sauna expertise. Harvia offers a perfect range of products for a wood-heated sauna. This wide range includes stoves, sauna heaters, water heaters, cauldrons, protective sheaths for fireplaces, steel chimneys and smoke pipes, in addition to ready-made bench solutions.

### *The good draught and heat output of Harvia's woodburning stoves is the result of almost 70 years of product development*

The efficient and reliable core of Harvia's woodburning stoves is created based on almost 70 years of experience in saunas. The frame's high-quality design ensures draught. The stove is easy to turn on, and the logs burn evenly the entire time the sauna is in use.

From the fire chamber, the gas generated is channelled into wide twin channels that efficiently heat the frame and pile of stones, allowing for quick heating and providing pleasant warmth. Any excess water thrown on the stones drains away via the rear section of the stove, keeping the facade and floor completely clean. The massive frame of the stove heats your sauna quickly and evenly. The high-quality core of the woodburning stove is the soul of the sauna.

1. Air heating between the body and the outer casing.
2. Air flow through the stone space.

## Selecting a stove

The stove is part of the sauna's interior design and ambience. Find the right design for you from Harvia's range of woodburning stoves. A properly built sauna room is a very important factor in getting the most out of your woodburning stove. The stove power is selected based on the size and material of the sauna.

An average of 1 kW of power is required for each cubic metre of sauna volume. The power requirement increases if there are window surfaces or heat-storing surfaces such as brick or concrete in the sauna.

### Considerations when choosing the stove power:

- Start the selection process by measuring the cubic volume of your sauna.
- For each non-insulated square meter, add 1.2 cubic meters to the volume of the sauna.
- If the interior walls of the sauna room are made of non-insulated logs, the corresponding factor is 1.5.
- A handy tool is available for these calculations at [www.harvia.fi](http://www.harvia.fi)

## Original Harvia sauna stones

Harvia sauna stones are selected according to old sauna traditions, and they provide bathers with gentle heat and steam. Harvia's woodburning stoves must always be used with massive, split-face sauna stones, as they store plenty of heat and their broad fracture surface allows the water thrown onto them to vaporise efficiently. Angular split-face stones also allow for loose placement of the stones. Light (ceramic), soft (soapstone) and smooth (rounded) sauna stones do not produce the desired results.

Harvia sauna stones are available in two sizes. Harvia recommends stones measuring 10–15 cm in diameter for woodburning stoves.

AC3020, 20 kg  
 ø 10–15 cm

## Perfect sauna moments – choosing the right heater

What kind of heat do you prefer? Are you looking for a heater for your cabin sauna or a large community sauna? Different heaters are suitable for different saunas and needs. In addition to your own preferences, you should consider the size and structure of the sauna. Fortunately, there is plenty to choose from.

### 1. Your own sauna bathing style

- Should the style of the sauna be modern or traditional?
- Do you like soft or sharp heat?

### 2. Demands for the sauna

- How often will the sauna be used?
- Will the bathers include children, for example?
- Will there be need for heating water?

### 3. Placement of the heater

- Location and placement of the chimney
- Safety distance from structures

### 4. Sauna room volume and materials

- What are the dimensions of your sauna? A larger sauna requires more power. Does the sauna have log walls or glass surfaces? These increase the power requirement of the heater

### Soft baths

For soft baths, heaters with a large mass of stones are the right solution. The temperature of the sauna stays moderate, and the large mass of stones ensures a humid bath with lots of steam. You can also heat a separate Legend smoke pipe guard with the smoke pipe, which further increases the mass of stones. You will not run out of heat even if the fire goes out for a moment. Instead, the temperature remains stable. Enjoy a soft sauna bath with your family!

See: *Harvia Legend* and *Harvia Legend smoke pipe guard*

### Sharp baths

Harvia's traditional woodburning stoves are sure to give you a traditional hot and sharp bath. The sauna heats up to a high temperature and you feel the heat on your skin with every throw.

See: *Harvia Pro and Harvia M*

### Small sauna and efficient use of space

In a small space, the heater's space requirement and ease of use are emphasised. The heater must not be too powerful, as it would heat up the sauna too quickly. It must also be possible to use the heater safely.

Protective sheaths around the heater allow installation in a small space without restricting air circulation, and the heater can be placed close to the walls and bench. Make sure there is enough space in front of the heater for safe use and easy adding of wood.

Also check out the woodburning stove models that are heated from outside the sauna. They provide easy access and create a fireplace atmosphere outside the sauna. This will help you make the most of your sauna space and keep your sauna clean.

See: *Protective sheaths and DUO/SL woodburning stoves*

### Large saunas

Large saunas and traditional log saunas require a lot from the heater to maintain an even temperature. The heater needs to have a lot of power, durability and good air circulation.

A high-powered traditional woodburning stove with protective sheaths is a solid choice. Fixed fireproof walls, for example, may restrict air circulation in the sauna. The protective sheaths of the heater allow the heater to circulate air from the back as well, ensuring an even temperature and rapid heating.

A well-designed large sauna maintains an even temperature and heats up quickly, saving wood and the environment.

See: *Harvia 36 and protective sheaths*

### Heating water in the sauna

Water can be heated quickly and easily in the sauna with the heaters' water tanks or a cauldron. A quick and space-saving solution is a pipe-mounted water tank or a woodburning stove with a water tank. These solutions provide sufficient bathwater for the bathers, as the water heats up very quickly. You can also purchase a separate water tap for your water tank for comfortable and safe use.

Harvia cauldrons are the solution for greater water needs. The cauldron gives your sauna the traditional feel of a country sauna, and you can also use it to heat water when the sauna is cold.

See: *Pipe model water heaters and cauldrons*

## **WOODBURNING STOVES**

*Wood is a natural choice – it opens your senses to enjoyment. Relax in the gentle embrace of your sauna and feel the spirit of an authentic sauna. Elegant design, high-quality materials and respect for the Finnish sauna tradition make the Harvia woodburning stove the heart of your sauna.*

- ✓ 20% lower particulate emissions
- ✓ 70% lower carbon monoxide emissions
- ✓ 90% larger glass door

## Elegance of a larger glass door with cleaner combustion

### Harvia Legend 240 GreenFlame

Fire roars cleanly behind the large glass door of the Harvia Legend 240 GreenFlame woodburning stove, and you can just enjoy the magical and relaxing ambience. The low-emission, durable and easy-to-use sauna heater is suited to medium-sized saunas. Its hefty stone quantity guarantees a traditional, soft saunabath.

The heart of the sauna heater is a fully renewed GreenFlame fire chamber, which has been designed with clean combustion in mind. The new fire chamber reduces the particulate emissions generated by wood combustion by one fifth and carbon monoxide emissions by 70%. Choose a one-of-a-kind handmade Legend and start your own legendary sauna story.

 10–24 m<sup>3</sup>     200 kg

Modell: WK200LD

Dimensions: width 600 mm, depth 600 mm, height 835 mm, weight 82 kg

## GreenFlame

### sustainably towards cleaner wood burning

The Harvia GreenFlame® fire chamber has been optimised with clean combustion in mind. GreenFlame is a part of Harvia's persistent development work on our journey towards wood combustion with lower emissions.

Thanks to the new air control method of the Harvia GreenFlame® fire chamber, the particulate and carbon monoxide emissions are significantly lower than before. The smaller the share of carbon monoxide emissions is compared to the total combustion gases, the cleaner the combustion process.

- 1 Air is conducted through the ash box and the hatch to the fire chamber.
- 2 There, the air is mixed evenly with the combustion process, which leads to clean combustion.
- 3 The hot flue gases go through the channels in the top part of the sauna heater, efficiently transmitting heat to the heater frame, stones and the whole sauna.
- 4 The combustion gases exit through the chimney.

 For more technical details, see page 51 onwards.

# Handmade – stories about steam

## Legend products

The Harvia Legend is a story about authenticity and extremely durable Harvia quality. Every Harvia Legend product is part of the heroic story of Harvia, founded in 1950 and currently the world's largest sauna heater and stove manufacturer. Every Legend product is a handmade masterpiece by Harvia's master blacksmiths. Choose Legend and start your own legendary sauna story.

The Harvia Legend provides you with the ultimate sauna experience. This large stove takes you back to the origins of stoves – it is a stove in its purest form. The patinated steel frame of the Harvia Legend contains a large amount of stones that gives off a generous amount of steam even in large saunas as it heats up. Due to the open structure of the stone compartment, you can throw water on the entire outer surface of the stove. The heat stored in the large number of stones allows you to throw more water even at a lower temperature – you can enjoy delightfully humid steam in your sauna.

# Handmade stories about steam. For small saunas.

## Harvia Legend 150

The Harvia **Legend 150** offers comfortably humid steam for a smaller sauna. The stove is a treat for the eye and for the sauna users. The Harvia Legend 150 is equipped with a cast-iron-framed glass door, allowing the warm glow of the fire to add to the ambience in the sauna. The stove is equipped with adjustable feet for easier installation.

6–13 m<sup>3</sup> 120 kg

! For more technical details, see page 51 onwards.

The fire chamber of Harvia Legend stoves has a modern grate structure that divides the combustion air. Part of the air is led to the upper part of the fire chamber. This way the burning is more efficient and cleaner. The grate structure also lengthens the stove's service life. The smaller than usual safety distances from the side and back surfaces to combustible materials allow you to place the benches more freely. The stove can be equipped with a pipe model water heater.

## Handmade stories about steam. For medium-sized saunas.

### Harvia Legend 240

The **Harvia Legend 240** is an excellent choice for a medium-sized sauna. The stove is equipped with a cast-iron-framed glass door, allowing the warm glow of the fire to add to the ambience in the sauna. The stove is equipped with adjustable feet for easier installation.

 10–24 m<sup>3</sup>  200 kg

Stove: WK240LD

LEGEND 240

## Handmade stories about steam. For large saunas.

### Harvia Legend 300

The Harvia **Legend 300** provides a generous amount of steam in medium-sized and large saunas. The stove comes with a large and stylish steel-framed glass door. The large fire chamber can even fit bigger firewood, with the maximum length being 47 cm. The stove is equipped with adjustable feet for easier installation.

 14–28 m<sup>3</sup>  260 kg

Stove: WK300LD

Stove dimensions: width 600 mm, depth 660 mm, height 1040 mm, weight 94 kg

LEGEND 300

Also check out the range of Legend products heated from the other side of the wall on page 30!

 For more technical details, see page 51 onwards.

## Accessories for Harvia Legend heaters and stoves

### Smoke pipe guard for Legend stoves

A wood-heated Legend stove can be equipped with a stone-filled smoke pipe guard. When the guard is used, the safety distance to the smoke pipe is significantly shorter, as the heat is mostly stored in the stones. The product is both elegant and practical, as water can be thrown onto a much larger area. The product can be used in all wood-heated Legend stoves and with Harvia steel chimneys.

 40 kg

Modell: WL300

Dimensions: width 300 mm, depth 300 mm, height 560 mm, weight 4,5 kg

### Protective sheath for Legend stoves

The protective sheath for Legend stoves reduces the safety distances considerably. The number of protective sheath elements mounted can range from 1 to 3 as required. The product can be used with all wood-heated Legend stoves. The sheath is made of a metal sheet that has been painted black.

Modell: WL200

Dimensions: width 520 mm, depth 125 mm, height 1000 mm, weight 6,7 kg

### Protective bedding for stoves

The protective bedding is made from aluminium-zinc-coated steel sheet that is painted black. The protective bedding is used, for example, when the stove is installed onto a waterproofed tile floor.

Modell: WL100

Dimensions: width 470 mm, depth 665 mm, height 60–75 mm, weight 10 kg

### Safety railing for Legend heaters and stoves

The Harvia Legend safety railing is mounted around a Legend heater or stove. The safety railing is made of heat-treated wood. The railing's mountings are painted black. The safety railing can also be mounted as a two-level installation in front of the heater. Additional mounts are necessary for mounting the safety railing as two halves.

Modell: SASP0240 / SASP0241

Dimensions: width 780/850 mm, depth 780/850 mm

Legend safety railing  
SASP0240 / SASP0241

## A masterpiece by a master blacksmith. For cottage saunas.

### Legend water heater, 25 litres

Perfectly compatible with Legend stoves, the pipe model water heater quickly heats up your bathwater. The 25-litre water heater will crown your Legend stove the king of all cottage saunas. The tap solution of the Legend water heater is placed away from the hot water tank and the stove. This makes the tap safer to use, as there is no fear of hot water splashes. For safe sauna experiences – Harvia.

15 kg

Modell: WP250LD

Dimensions: width 360 mm, depth 360 mm, height 910 mm  
(water tank height 450 mm), weight 10 kg

## Completing the sauna interior

### Legend sauna light

Like the name suggests, the appearance of the Legend sauna light is linked to rustic Legend stoves. Colour black. Dimensions 230 x 180 mm (width x height) Includes both a light and a shade. Protection rating IP44, E14 bulb (max. 40 W) not included in the delivery.

Modell: SAS21107

Dimensions: width 230 mm, height 180 mm

### Legend glass doors

Complete your sauna interior with a Legend glass door that is a good match for Legend heaters and stoves. The door frame is made of black stained pine, while the handle is made of black painted hardwood. The glass door is available in clear, bronze, smoky grey and satin. Legend glass doors are available in all standard sizes: 7 x 19, 8 x 19, 9 x 19, 8 x 21 and 9 x 21. The door is also available with an aluminium frame painted black.

## New and improved stove for vigorous bathing

### Harvia 20 Pro

The **Harvia 20 Pro** stove is designed for vigorous bathing in medium-sized saunas. Thanks to the large stone compartment of the stove, the steam is as pleasant and hearty as you can wish for. The fire glowing behind the cast-iron-framed glass door adds to the ambience of the sauna.

The sturdy 10-millimetre-thick fire chamber cover ensures durability. The model also features adjustable feet to facilitate installation. They can be used to adjust the height of the smoke outlet, for example. The stove can be equipped with a pipe model water heater.

In this new generation of Harvia 20 Pro woodburning stoves, the shapes and contours of the stoves have been given a new fresh look while respecting the traditions of the classic Pro 20 stove.

## A perennial favourite for cottage saunas equipped with a water tank

### Harvia 20 Pro LS and Harvia 20 Pro RS

Equipped with water tanks on the side, the **Harvia 20 Pro LS** and **Harvia 20 Pro RS** are practical stoves that provide a hearty amount of steam. Water heats up in a spacious 30-litre water tank while the stove is being heated. The fire glowing behind the glass door with a narrow cast iron frame adds to the ambience of the sauna. The sturdy 10-millimetre-thick fire chamber cover ensures durability. The stove has a large stone compartment and steel upper grating. The stoves are equipped with adjustable feet.

The water tank is located on the left (L) in the Harvia 20 Pro LS and on the right (R) in the 20 Pro RS. Together with the Harvia 20 Pro ES, these stoves equipped with a water tank make it easy to choose the model best-suited for your sauna.

The fire chamber and combustion air channels of Harvia stoves are designed so that the sauna warms up quickly and the burning is cleaner.

## Great baths for a great group of people

### Harvia 36 Pro

The **Harvia 36 Pro** is a powerhouse stove for big saunas. Its features ensure that even a larger group of people can enjoy a hearty amount of steam. The generous amount of stones makes it possible to enjoy the stay in the sauna for a long time. You will not run out of heat even if the fire temporarily goes out. The stove has an upper grate made of steel. Thanks to the adjustable feet, the stove can be easily placed in the sauna.

The outer casing of the stove is painted graphite black. The stove can be equipped with a pipe model water heater.

## The king of public saunas

### Harvia 50

The **Harvia 50** stove is the king of public saunas, designed to provide ample steam for large groups of bathers. The great amount of stones guarantees even heat in a large sauna. The steam given off by the stove contains the age-old spirit of the Finnish sauna tradition. The Harvia 50 stove is designed for camp centres, sports centres and service sector businesses, among others. The stove is painted in a stylish graphite black. When you demand quality, choose the leader of the pack – a quality product by the world’s largest sauna stove manufacturer.

## Twice the atmosphere

### Harvia 20 Pro Duo and Harvia 36 Pro Duo

The **Harvia Pro Duo** stove is a unique 2-in-1 solution that combines a wood-heated STOVE AND A FIREPLACE. Heating up the stove lets you enjoy the atmosphere in two rooms.

Heat up your sauna to bathing temperature – and enjoy the pleasant atmosphere of the fireplace in the next room at the same time. The wood-heated stove creates a traditional sauna atmosphere and gives off great steam. After the sauna, you can enjoy the afterheat in the fireplace room, cook sausages and enjoy refreshments... and then hit the sauna again. Style is also one of Duo’s strengths: The outer casing is made of high-quality stainless steel, the stove features an impressive and robust glass door and the stove technology is created by the world’s largest sauna stove manufacturer with 70 years of experience. Duo is more than the sum of its parts.

## A stove and a fireplace in one

*Harvia M3 SL, Harvia 20 Pro SL,  
Harvia 20 Pro SL Boiler*

SL stoves are designed for those who want to conveniently heat their sauna from another room or from outside the building. Convenience is also improved by the fact that the stove's door can be installed to open on either side to accommodate your needs. The SL stove gives off great steam in small and medium-sized saunas.

The SL stove features a glass door that provides ambience. The Harvia M3 SL stove can be equipped with a pipe model water heater.

Boiler stoves can be connected to a separate water tank.

## A masterpiece by a master blacksmith.

### Harvia Legend SL

**Harvia Legend** wood-heated stoves give you the ultimate sauna experience. The black steel frame contains a mighty amount of stones. The heat stored in the stones allows you to throw more water even at a lower temperature. You will not run out of heat, even if the fire goes out for a moment.

The fire chamber of Harvia Legend stoves has a modern grate structure that divides the combustion air. Part of the air is led to the upper part of the fire chamber. This way the burning is more efficient and cleaner. The grate structure also lengthens the stove's service life. The smaller than usual safety distances from the side and back surfaces to combustible materials allow you to place the benches more freely.

The Harvia Legend SL stove is designed for those who want to conveniently heat their sauna from another room or from outside the building. The stove's door can be installed to open on either side to accommodate your needs. The stove is equipped with adjustable feet for easier installation.

 6–13 m<sup>3</sup>  120 kg

## For those who enjoy the sauna and love a fireplace.

### Harvia Legend Duo

The **Harvia Legend 240 Duo** stove is a unique 2-in-1 solution that combines a wood-heated STOVE AND FIREPLACE. Heating up the stove lets you enjoy the atmosphere in two rooms.

Heat up your sauna for bathing and enjoy the pleasant atmosphere created by the fireplace on the other side of the wall. The patinated steel frame of Legend contains a large amount of stones, resulting in wonderfully humid and gentle clouds of steam reminiscent of those of an authentic smoke sauna. After the sauna, you can enjoy the after-heat in the fireplace room, cook sausages and enjoy refreshments... and then hit the sauna again.

The stove's door can be installed to open on either side to accommodate your needs. The stove is equipped with adjustable feet for easier installation.

LEGEND 300 DUO

## Innovation meets Finnish design

### Harvia Duo glass wall

The Harvia Duo glass wall is a brilliant innovation. Designed for use with Harvia Duo stoves, the glass wall is not only a decorative element, but a way to share light and heat between the sauna and the sitting room. The glass releases more heat to the sitting room than masonry walls, and does so much more quickly.

You can also install the stove and the glass wall so that the stove door opens to your patio and the glass wall allows natural light to illuminate the sauna. The light-coloured satin glass wall also makes it possible to bring large glass surfaces to outdoor saunas, such as the Harvia Solide Outdoor design sauna.

#### The Duo glass wall is an easy solution

- no masonry
- the delivery contains all the necessary parts, including plating for covering the fire chamber extension and a floor protector
- get the benefits of the Duo stove in the sauna room: the room stays tidy and you can place the benches as freely as in an electric sauna

#### The Duo glass wall is compatible with all Harvia Duo stoves

Harvia Legend 240 Duo, Harvia Legend 300 Duo, Harvia 20 Duo, Harvia 36 Duo

PRODUCT	PRODUCT SIZE					GLASS, THICKNESS 8 MM	
	Aluminium frame (mm)	Frame colour	Aluminium trims	Frame depth (mm)	Weight (kg)	Size (mm)	Colour ***
DL91905AA	890 x 1890**	white	x	60	39	820 x 1820	Satin
DL92105AA	890 x 2090**	white	x	60	43	820 x 2020	Satin

\* You must leave a gap measuring 25 to 35 mm between the glass and the floor for the floor protector. The part of the floor protector that extends under the glass is designed to prevent water from getting into the space where the stove's door is located. The seams must be sealed with a suitable adhesive sealing compound.

\*\* Installation hole size with frames DL91905AA = min. 900 x 1,900 mm, DL92105AA = min. 900 x 2,100 mm.

\*\*\* The glass does not contain iron, which is why it has no tint of green, instead being fully white.

## **FIRE SAFETY AND STOVE ACCESSORIES**

*The warm embrace of a wood-heated sauna is the best place for relaxation. The pleasant hum of the stove and gentle light cast by the flames add ambience to the sauna experience. Good sauna design and the right accessories also ensure the safety of the bathers and the sauna room.*

## A stylish chimney solution

### Harvia steel chimney

The Harvia steel chimney is a stylish chimney solution that is easy to install. The steel chimney withstands extensive changes in temperature and is particularly designed for use with woodburning stoves, smaller fireplaces and iron stoves in detached sauna buildings.

#### DELIVERY CONTENTS:

- 1.5 m steel chimney
- A utility box containing one metre of non-insulated smoke pipe, a rain cap, a rubber rain flange and an installation set for the rain flange, a stainless steel lead-through flange for the ceiling and a lead-through insulation and protector.

### Build a chimney solution that is the right fit for you

The 1.5 m steel chimney can be easily extended with extensions measuring 0.5 and 1.0 metres in length. By connecting extensions and smoke pipes to the steel chimney (see page 39), you can build a chimney solution that meets your needs. Thanks to an ingenious joint mechanism, the supplementary parts are wound together and the smoke pipes are locked in place by their grooves. Indoors, the chimney can be installed up to a height of 3 metres without support. Outdoors, the corresponding self-supported installation height is 2 metres.

Carefully read through the instructions for the use and installation of the steel chimney and the fireplace or stove connected to it.

WHP 1500

WHP 1500M

### Steel chimney damper plate

Harvia's insulated damper plate makes the steel chimney even better suited for heated sauna buildings used in the winter. The CE marked damper plate meets the fire safety requirements and can be installed with all Harvia steel chimneys. The damper plate is available in two colours: steel and black.

WHP 270SP

WHP 270SPM

## PROTECTIVE SHEATHS AND BEDDING

The durable, tested and safe Harvia protective sheaths significantly shorten the safety distances to combustibile materials; in practice, this helps the stove fit into a smaller space. The settling of log walls does not prevent the use of a protective sheath. Together, a Harvia protective sheath and a CE marked Harvia stove form a tested functional whole.

### *Stove-specific protective sheaths*

The protective sheath is attached to the stove and conforms to the shape of the stove, making the combination sleek. As the protective sheaths are stove model-specific, no compromises have been made in terms of design or performance.

Protective sheaths are available both as a full version and as one-sided sheaths that can be installed on either side of the stove. The protective sheaths are made from painted, aluminium-zinc-coated steel sheet. Protective sheaths can be installed horizontally as near as 50 millimetres away from combustibile materials.

### *Protective bedding*

The protective bedding is used when, for example, the fireplace or stove is installed onto a waterproofed tile floor.

Please note! The floor in front of the fireplace or stove must be covered with a floor protector.

## **WATER HEATING, HEATING AND COOKING**

*Heating clean water and cleansing yourself is an ancient tradition that is part of bathing in a wood-heated sauna. Carry in water from nearby and heat it in a traditional sauna cauldron to add ambience. How about making the most out of the holiday home feel by enjoying vegetables or fish you have smoked yourself after bathing in the sauna?*

## Traditional cottage atmosphere with a sauna cauldron

Harvia cauldrons are designed for heating larger amounts of water, mostly in cottage settings. They provide the atmosphere of a genuine Finnish old-time lakeside sauna. You can choose a traditional sauna cauldron from two different models based on your need for water, with a volume of either 50 or 80 litres. The durable, stainless steel inner cauldron can easily be lifted out for cleaning.

### Harvia cauldron 50 litres

Thanks to the structure of the fire chamber of the 50-litre cauldron, the burning process is smooth and the heat is focused directly under the inner cauldron, heating up the water efficiently. The replaceable fire chamber makes the product long-lasting.

The outer casing of the Harvia cauldron 50 l is made of stainless steel.

Modell: WP500

Dimensions: width 435 mm, depth 500 mm, height 700 mm, weight 36 kg, smoke outlet diameter 115 mm

### Harvia cauldron 80 litres

The traditional vermiculite insulation of the 80-litre cauldron keeps the outer surface of the cauldron cooler. The outer casing of the Harvia cauldron 80 l is painted black.

Modell: WP800

Dimensions: width 590 mm, depth 590 mm, height 810 mm, weight 85 kg, smoke outlet diameter 140 mm

## A water heater for wood-heated stoves

### Harvia pipe model water heater

The pipe model water heater (22 l) is installed directly on top of the stove. The water heats up quickly, as the smoke pipe running through the tank also acts as a wall inside it. Suitable for all wood-heated Harvia stoves, with the exception of Harvia 50.

Modell: WP220ST

Dimensions: width 355 mm, depth 190 mm, height 410 mm, smoke outlet diameter 115 mm

HARVIA CAULDRON 50L

HARVIA CAULDRON 80L

HARVIA PIPE MODEL  
WATER HEATER

### Harvia Thermio water heater, 25 litres

The stylish steel outer shell of the Thermio water heater suits any sauna. The Thermio water heater heats the water quickly, as the smoke pipe acts as a wall in the water tank. The tap solution is placed away from the hot water tank and the stove. The tap can be installed in three different ways onto the benches or the wall. This makes the tap safer to use, as there is no fear of hot water splashes. For safe sauna experiences – Harvia.

**Modell:** WP250TH  
**Dimensions:** width 360 mm, depth 280 mm, height 910 mm  
 (water tank height 450 mm), weight 7 kg, smoke outlet diameter 115 mm

**THERMIO  
 WATER HEATER**

#### A safe tap solution

The tap is placed away from the hot water tank and the stove in the Legend and Thermio water heaters. A silicone hose measuring a few metres is attached to the bottom of the water tank, with a water tap at the other end.

The tap can be installed under the edge of the bench with a fixing bracket or embedded into the board at the edge of the bench. The tap can also be secured to the wall with a fixing bracket.

### Harvia electric water heater

The Harvia electric water heater is mounted onto a wall. The easy-to-use and efficient water heater is designed for places where no hot tap water is available, such as summer cottage saunas and kitchens, public rest cabins, and hostels. The tank holds 27 litres. The water is heated by the heating element located at the bottom of the tank, which also makes the heater easy to clean. The temperature can be adjusted conveniently with the thermostat. Choose reliable and durable Harvia quality and treat yourself with warm washes and sauna experiences.

 1,8 kW

**Modell:** WP350ST  
**Dimensions:** width 420 mm, depth 210 mm, height 400 mm

**ELECTRIC  
 WATER HEATER**

## Harvia sauna accessories

Harvia's selection of sauna accessories offers everything from high-quality sauna stones to water buckets and ladles, sauna whisks, sauna fragrances and firewood racks.

## A heat source for your sauna cottage

### Harvia 10 iron stove

The entire fire chamber and cooking surface of the Harvia 10 are made of sturdy cast iron that stores heat well. The iron stove's convenient size also makes it easy to place. The iron stove has a durable door with a cast iron frame and ceramic glass. The bottom section includes a handy storage compartment. Output 6.7 kW/20–200 m<sup>3</sup>.

Modell: WU100

Dimensions: width 360 mm, depth 570 mm, height 750 mm, weight 85 kg

HARVIA 10

## Delicacies cooked over an open fire, smoked, grilled

### Harvia flare smoker

Its stylish appearance, durability and ease of use in particular make the Harvia flare smoker into a desired high-quality product. Ample amounts of stainless steel were used in its manufacture. All the grates are chrome-plated and can be washed normally. The flare smoker includes a heating plate, a drip pan, handles, grates for smoking and cooking food over an open fire and brackets for the grates. A steel outdoor griddle pan is available as an accessory.

You can cook almost anything with the Harvia flare smoker. You can purchase an outdoor griddle pan (available as an accessory) to cook fish, meat, crêpes and vegetables. The fire chamber makes it easy to cook baked potatoes, turnips and roasted meat, for example. Chicken and steaks cook quickly when you roast them over an open fire. Many delicious desserts can also be prepared with the flare smoker.

Modell: WS100

Dimensions: width 420 mm, height 700 mm, weight 17 kg

### Harvia Legend accessories

### Protecting the floor

Concrete floor without tiles. The stove can be installed directly on a concrete floor if the concrete is at least 60 mm thick. Make sure that there are no wires or water pipes in the concrete cast below the stove.

Tile floor. The floor glues and plasters as well as the waterproof materials used below the tiles are not resistant to the heat radiation from the stove. Protect the floor with Harvia's protective bedding or other similar protection from heat radiation.

*The largest manufacturer of sauna heaters in the world has the right heater for every sauna.*
